Foxi Watch detailed Features

Using the watch

Using the watch is very simple and easy, in order to control the watch, all you need is just to send SMS text message from another mobile to the watch.

In the left side of the watch, there are two buttons and USB charging plug. We made it as simple as possible, to avoid any misapprehension mistakes. Before you start using the watch, you need to purchase a SIM card from a mobile carrier provider that supports 2G, and buy talk and text plan. You are ready to go!

Watch's Display

On the watch's display you can find only the time and the date, and no other misleading screen that can confuse kids and elder people.

The watch has no games inside, no SMS texting, no internet, no music and no camera. Simple as that.

Phone calls

You can call the watch. When the person who wears the watch presses the "answer" button, he can speak directly to the watch (just like in the movies!).

No need to hold the hand close to the head, the Speaker is turned on automatically.

Moreover, you can call from the watch to three numbers, which you set in advance. This option avoids overuse of watch mobile talk.

GPS Tracking

Foxi Watch has a built in GPS chip.

If you wish to see the watch's location, meaning, the position of the child \ elder that wears it, Just send a simple SMS message from a different mobile phone, the watch will reply back the address, map location and coordinates.

Auto Answer call

Foxi watch has a built in "auto answer" feature.

This feature allows you to speak with the person that wears the watch, even if he decided not to answer the incoming phone call.

Auto answer is a feature that designed to be useful in a case, which the person who wears the watch is unable to press the answer button by himself.

Monitor

Foxi has a built in Monitor feature.

Monitor turns the watch into a listening mode. This means that the person that calls to the watch will be able to listen to the watch's surrounding.

This feature let you hear that everything is fine with the person that wears the watch, without talking to him directly.

For instance, turn on the monitor for your child to check if you really hear his teacher talking.

SOS emergency SMS

Foxi has a built in SOS emergency button.

Pressing this button will send the GPS location of the watch to all the three numbers you set in advance.

This feature is very useful in case that the persons that wears the watch feel in danger. Simple press on the watch alarms his guardians.

Who needs Foxi?

Kids, that their parents want to communicate with them outside home, and locate them anytime.

Adults, that wants to inform their family in case of emergency, and help them to communicate if they cannot handle regular mobile devices.

Alzheimer's disease patients and blind people can wear the watch and their guardians can call them and find them if they get lost.

Traveling and tourists can wear the watch instead of expensive mobile devices. People at home can track them and communicate with them.

Tracking device for any other use. For example, you can install Foxi watch in your car and locate it anywhere.
